Security Awareness Training Software (continued)

Security Awareness Training Software Definition

Security awareness training software provides businesses with online courses to train and assess their employees' security readiness. Businesses use these tools to outsource security training to specialized providers with experience and courses specific to a variety of security measures. Many of these tools deliver simulated attacks or fraudulent emails to help employees better identify malicious content before encountering it in real-life scenarios.

While some online course providers offer security awareness training, the products listed in this category are courses specific to cybersecurity and information security in the workplace.

To qualify for inclusion in the Security Awareness Training category, a product must:

- Provide educational security courses
- Offer online classes or a web-based educational content
- Provide training and assessment tools

Security Awareness Training Grid® Scoring Description

Products shown on the Grid® for Security Awareness Training have received a minimum of 10 reviews/ratings in data gathered by November 21, 2023. Products are ranked by customer satisfaction (based on user reviews) and market presence (based on market share, seller size, and social impact) and placed into four categories on the Grid®:

- Products in the Leader quadrant are rated highly by G2 users and have substantial Market Presence scores. Leaders include: KnowBe4 Security Awareness Training, Hoxhunt, MetaCompliance Security Awareness Training, SoSafe, Arctic Wolf, Infosec IQ, NINJIO Security Awareness, and SANS Security Awareness Training
- High Performing products have high customer Satisfaction scores and low Market Presence compared to the rest of the category. High Performers include: Hacker Rangers Security Awareness, PhishingBox, Webroot Security Awareness Training, usecure, CybeReady Security Awareness Training Platform, Curricula, Fortra's Terranova Security, Carbide, Riot, Boxphish Security Awareness and Phishing Simulation, Phished, Hook Security, GoldPhish, Defendify All-In-One Cybersecurity® Solution, Junglemap, Nimblr Security Awareness, Global Learning Systems, cyberconIQ Cyber Awareness Training, Right-Hand Cybersecurity, CultureAI, and CyberHoot Cybersecurity Awareness Training
- Contender products have relatively low customer Satisfaction scores and high Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Contenders include: Proofpoint Security Awareness Training, Immersive Labs, Barracuda Security Awareness Training, and Symantec Phishing Readiness
- Niche products have relatively low Satisfaction scores and low Market Presence compared to the rest of the category. While they may have positive reviews, they do not have enough reviews to validate those ratings. Niche products include: Inspired eLearning Powered by VIPRE, Secure Code Warrior, ThreatAdvice Cybersecurity Education, CyberVista, BullPhish ID, Avatao, Security Journey, ThreatCop, and Haekka

Grid® Methodology

Grid® Rating Methodology

The Grid® represents the democratic voice of real software users, rather than the subjective opinion of one analyst. G2 rates products from the Security Awareness Training category algorithmically based on data sourced from product reviews shared by G2 users and data aggregated from online sources and social networks.

Technology buyers can use the Grid® to help them quickly select the best products for their businesses and to find peers with similar experiences. For sellers, media, investors, and analysts, the Grid® provides benchmarks for product comparison and market trend analysis.

Grid® Scoring Methodology

G2 rates products and sellers based on reviews gathered from our user community, as well as data aggregated from online sources and social networks. We apply a unique algorithm (v3.0) to this data to calculate the Satisfaction and Market Presence scores in real time. The Grid® Report for Security Awareness Training | Winter 2024 is based on scores calculated using the G2 algorithm v3.0 from reviews collected through November 21, 2023. To view the Security Awareness Training Grid® with the most recent data, please visit the Security Awareness Training page. For more details on Grid® Scoring, please view the G2 Scoring Methodology here.

Grid® Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available categorization methodology. All products appearing on the Grid® have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®. A list of standard definitions is available to G2 users to eliminate confusion and ease the buying process.

(Grid® Methodology continues on next page)

Grid® Methodology (continued)

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and social data collected by G2 up through November 21, 2023. The ratings may change as the products are further developed, the sellers grow, and as additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received. By improving their products and support and/or by having more satisfied customer voices heard, Contenders may become Leaders and Niche sellers may become High Performers.

Trust

Keeping our ratings unbiased is our top priority. We require the use of a LinkedIn account or verified business email address to validate a G2 user's identity and employer. We also validate users by partnering with sellers and organizations to securely authenticate users through select platforms. We do not allow users to review their current or former employers' products, or those of their employers' competitors. Additionally, all reviews are manually checked by our team after our algorithm filters out reviews that don't meet our submission requirements. All reviews must pass our moderation process before they are published.

Our G2 staff does not add any subjective input to the ratings, which are determined algorithmically based on data aggregated from publicly available online sources and social networks. Sellers cannot influence their ratings by spending time or money with us. Only the opinion of real users and data from public sources factor into the ratings.

G2 may occasionally offer incentives for honest reviews to help us gather a full and accurate data set. These incentives are offered as thank-yous for approved reviews. Incentives are never conditioned upon the substance of the review, positive or negative. Each such incentivized review is disclosed with an "Incentivized Review" banner.

Grid® Inclusion Criteria

All products in a G2 category that have at least 10 reviews from real users of the product are included on the Grid®. Inviting other users, such as colleagues and peers, to join G2 and share authentic product reviews will accelerate this process.

If a product is not yet listed on G2 and it fits the market definition above, then users are encouraged to suggest its addition to our Security Awareness Training category.

Product Profiles

Product profiles and detailed charts are included for products with 10 or more reviews.
